Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A frequent traveler	Get accurate and real-time weather information for different cities	Weather information is often presented as raw data that is difficult to understand	Temperature, humidity, wind, and weather conditions do not directly explain what I should do	Confused and uncertain when planning my travel or outdoor activities
PS-2	A weather application user	Get personalized advice based on the current weather conditions	Most weather services provide general information without personalized recommendations	They mainly display weather metrics without converting them into practical guidance	Inconvenienced when deciding what to wear, where to go, or which activities to plan
